

David Giménez Rodríguez De Rivera

Senior Frontend Engineer - Angular, SSR and Frontend Architecture

Madrid, Spain | davidgimenez97dev@gmail.com
LinkedIn: linkedin.com/in/davidgimenezrodriguezderivera | GitHub: github.com/Davidgimenez1997

PROFILE

Senior Frontend Engineer in Madrid with over 6 years of experience building high-performance Angular applications. Specialized in SSR, prerendering, scalable frontend architecture, headless CMS integration and Docker/Kubernetes deployments. Focused on turning product, SEO and performance requirements into maintainable solutions for real teams.

EXPERIENCE

Senior Frontend Engineer (Angular, SSR)

Grupo Orenes | June 2019 - Present

- Designed Angular architectures with SSR and prerendering for multi-brand, multilingual and SEO-oriented applications.
- Integrated headless CMS workflows with dynamic routes, multilingual content models, caching and content publishing processes.
- Automated build, prerender and deployment workflows with Node.js, Docker, Kubernetes and reproducible environment configuration.
- Improved frontend performance, TTFB and SSR stability through service separation, runtime cache and controlled invalidation.
- Built internal tooling and conventions to reduce repetitive work, redundant requests and configuration drift.

Stack: Angular, TypeScript, SSR, Prerender, Node.js, Docker, Kubernetes, Strapi

Frontend Web Developer

R. Franco Digital | March 2019 - June 2019

- Developed native Android applications with Java and Android Studio connected to REST APIs and local storage.
- Supported responsive web interfaces with HTML, CSS, JavaScript and Bootstrap in an agile team workflow.

Stack: Java, Android, REST APIs, SQLite, MySQL, HTML, CSS, JavaScript, Bootstrap

SELECTED PROJECTS

Distributed Angular Prerendering System

Distributed prerendering architecture for multi-brand Angular applications, improving indexable HTML, SSR stability and deployment independence.

Event-driven Prerender Queue

CMS event workflow that selectively regenerates affected routes without full redeploys or manual route tracking.

Headless CMS Dynamic Routing

Dynamic Angular routing model driven by headless CMS content, multilingual slugs, caching and per-page metadata.

CORE SKILLS

Core

Angular
TypeScript
RxJS
SSR
Prerender
Frontend Architecture
Web Performance
Technical SEO

Daily

SCSS
Bootstrap
Node.js
REST APIs
Headless CMS
Docker
Git
Build Automation

Familiar

Kubernetes
Helm
Strapi
PostgreSQL
Nginx
CI/CD
Analytics

EDUCATION

Higher Level DAM - Multiplatform Application Development

U-Tad Centro Universitario de Tecnología y Arte Digital | 2017 - 2019
Programming, computer systems, databases, development environments, data access, interfaces, mobile development, services/processes and enterprise systems.

High School Diploma in Science and Technology

IES San Isidro | 2013 - 2016
Foundation in mathematics, analytical thinking and problem solving.

LANGUAGES

Spanish - Native
English - Professional working proficiency
